

Press Release

Philipp Rösler becomes President of the New Advisory Board of the Zug based Investment Company CV VC.

CV VC has officially inducted Philipp Rösler, former German Federal Minister of Health (2009 to 2011) and of Economics and Technology (2011 to 2013), Vice Chancellor, FDP Federal Chairman and Managing Director of the World Economic Forum (WEF), as the new chair of its Advisory Board. The Zug-based investment firm invests in the most promising blockchain start-ups worldwide and operates both an incubation program for young companies as well as its own ecosystem (which includes events and a co-working space in Zug and in Liechtenstein).

Rösler's aim is to take CV VC and its innovative investment approach out into the world and anchor the company in Asia. He also sees himself as an ambassador for "Blockchain Nation Switzerland" and Crypto Valley, which - with its progressive regulation, over 900 registered companies and 4700 jobs - is one of the most important blockchain locations in the world. It is planned that the CV VC Advisory Board will further be supplemented by two additional, globally well-connected personalities from the worlds of business and politics.

Rösler is not the only former top politician involved with CV VC. The board of directors includes former Swiss Minister of Economics and President Johann N. Schneider-Ammann and Anne Berner, former Finnish Minister of Transport and Communications. CV VC is chaired by Alex Wassmer, CEO and President of Kibag AG.

About Crypto Valley Venture Capital

The private company, based in Zug, invests in crypto and blockchain companies at all stages of development.

[CV VC](#) offers seed funding and a three-month incubator program in exchange for equity or tokens.

[CV Labs](#) is a unique co-working space in Zug and Vaduz, tailored to the needs of blockchain companies, that regularly hosts Meetups and networking events. It is an ideal starting point for start-ups participating in the CV Labs incubation program.

[CV Competition](#) offers blockchain startups the opportunity to win a cash prize of USD 100,000 as well as access to industry executives, coaching and free office space in the CV Labs in Zug.

The [CV Summit](#) brings together innovative startups, industry experts, investors and companies experimenting with distributed ledger technology.

[CV Maps](#) is the first online directory of the rapidly growing block chain ecosystem in Crypto Valley. The continuously updated database contains over 840 companies.
